Conshohocken Station

WHAT:

SEPTA is planning to rebuild the Conshohocken Regional Rail Station to improve accessibility, safety, and customer experience.

WHERE:

Phase A: Existing Conshohocken Station Parking Lot

Phase B: Along tracks northwest of existing Conshohocken Station

(At intersection of Oak Street & Stoddard Avenue)

WHEN:

Phase A of the project will include renovating the existing station's parking lot. During this period the existing parking lot will be closed, and a temporary lot will be opened mid-June 2020 and will be located across the street, to the riverside adjacent to the Fayette Street Bridge. The station will remain in operation during construction.

The parking lot work is expected to take three months with the anticipated reopening of the lot in the Fall of 2020. SEPTA asks all riders during this time to use the designated pathways to the station. Please note that noise will be moderate to high at times.

Phase B of the project includes construction of the new station west of Oak Street to also include a new grade crossing. This work is projected to begin in the Late Summer/Early Fall of 2020 with an anticipated duration of two years. The existing station and renovated parking lot will remain open and in operation during this work.

DETAILS:

The new accessible station at Conshohocken to include:

- High-level, accessible platforms with ramps, stairs, guard & hand rails
- New station building on inbound platform with heated and air conditioned waiting room & restroom facilities
- Inbound platform canopy & windscreen, two open air passenger shelters & covered bicycle parking
- Upgraded signage, lighting, plazas, sidewalks & landscaping
- Storm water management system
- New drop off loop, accessible parking stalls and expanded parking at existing parking lot
- Vehicular and pedestrian grade crossing at Oak Street
- Realignment of Schuylkill River trail
- SEPTA KEY fare and parking equipment

Please contact Rochelle Culbreath, SEPTA Community Relations at 215-580-3490 or at rculbreath@septa.org with any questions or concerns.

SEPTA is committed to working with the communities we serve and investing in our facilities and infrastructure. For information regarding the SEPTA Rebuilding the System Program, including design and construction opportunities, visit www.septa.org/rebuilding.
